ENVIRON
TCA Chemical Peel
45-60mins

£79
Course of 6 £402.90
(15% Discount)

TCA or Trichloroacetic acid peel is a cosmetic chemical peel performed to treat a wide range of skin concerns such as;

- Visible signs of ageing
- Photodamage
- Acne
- Rosacea
- Scarring

The intelligent skin peeling system is far less aggressive than many conventional peeling systems & is scientifically proven to effectively refine, revive & brighten the skin.

Environs formulation of TCA is unique, safe & comfortable. This non-invasive approach to peeling stresses the skin at a low PH, low acid level to create a response. This response releases growth factors, which are essential for healthy, glowing skin.

Due to this 'kind' approach to skin peeling there is no down-time after treatment, but skin must be acclimatised to Environ moisturiser 3 weeks prior to treatment.

Results will be achieved after one treatment alone, but for long-lasting results a course of 6 is highly recommended (1 treatment performed, every 7-10 days)
